FANZ'infos

Les fanzines reviennent pour la joie de ce qui aime et pour le désespoir de ceux qui détestent. Mais enfin, je continue quand même, sans trier véritablement, en mettant côte à côte le pire et le meilleur. Les Dieux du CPC, dans leur infinie clairvoyance, sauront bien réduire à néant les faibles et glorifier les forts. C'est ainsi, j'ai dit. J'ai remarqué que 100% s'était mis à publier des fanzines par pages entières, ce qui prouve que je n'avais pas eu une mauvaise idée lorsque j'ai commencé la saga fanzinesque, il y a bien longtemps.

GENESIS DISC FULL CRACK'N'ROM

Voici trois fanzines sur disquettes en vrac : Génésis numéro 6 a fait des progrès au niveau des graphismes mais les «scans» sont moins bons que les «digits» à mon avis.

Disc Full est également à son numéro et il est beau, très beau même : des écrans déformés, beaucoup de couleurs, de la musique et une superbe intro.

Enfin Crack'n'rom est plus classique mais les quelques routines qu'il contient sont intéressantes.

ROOLSTRAD

AMSTRAD CPC + JEUX DE RÔLE

ROOLSTRAD

Le sous-titre est «Amstrad CPC + jeux de rôle». On comprend rapidement que Roolstrad traite... d'Amstrad CPC et de jeux de rôles ! Vous aussi vous l'aviez compris je pense. Le numéro 7 est un numéro maudit puisqu'il est sorti en retard. D'ailleurs tout ce qui porte le numéro 7 est marqué par la griffe diabolique de la cabale : les 7 nains, 7 sur 7, Télé 7 jours...

Mais là n'est pas le sujet, puisqu'en dehors des rubriques habituelles, il y a au moins deux articles originaux : CPC'S WORLD qui traite de la présence CPCienne dans le monde et «profession : scénariste».

AMSTCPC

Voilà un numéro 1 comme on aimerait en voir plus souvent : épais (13 pages recto), avec beaucoup d'articles variés : initiation Turbo-Pascal, pokes et bidouilles. Seuls les graphismes laissent parfois à désirer. Mais Amstcpc est aussi un club et vous pouvez le joindre à l'aide de votre minitel préféré en tapant 36-15 RTE*AMSTEL. Pour ceux qui n'ont toujours pas de minitel, un simple stylo suffira :

CROCOFANZ

Il paraît que la publicité dans CPC Infos, ça marche. C'est Guigui de Crocofanz qui le dit. Alors, il m'a envoyé son fanzine pour que le lectorat quadruple encore (ça fera 16 lecteurs en tout). Mais j'ai décidé de ne pas le passer dans CPC, de ne pas parler de l'initiation au Basic, de rester muet sur les tests de jeux, de taire les allusions aux autres fanzines parce qu'il ne faut pas exagérer quand même. Tiens, je ne vais pas non plus écrire l'adresse

EDITORIAL

Salut à tous! J'ai plein de nouvelles à vous annoncer. Tout d'abord, je ne suis plus seul à la rédaction: FRED s'occupera désormais des tests de jeux, et des listings. Ensuite entre le n°1 et le n°2, le nombre de lecteurs a quadruplé. (Merci CPC Infos!) Enfin dans ce numéro, vous trouverez 2 nouvelles rubriques: BD et FANZWORLD.

Bon, j'ai plus rien à vous dire
Bonne lecture,
GUIGUI

Le petit ELECTRO JACK

Il faut se faire au style du fanzine : des illustrations «fait-maison», des articles bizarres sur les bouteilles de gaz ou les lessives, des listings uniquement en Basic et très courts et puis, dernièrement une folle subite pour les sigles. Non, je ne parle pas des pin's mais des logos de marques connues. L'idée est parti du fanzine Microzine et depuis le pauvre Jacques été contaminé au dernier degré. Donc, toute un dossier est réservé à cette manie subite.

RUNSTRAD

Comment, il y a encore des possesseurs de CPC qui ne connaissent pas Runstrad ! C'est honteux. Voilà un fanzine qui contient tout ce que vous pouvez chercher : des tests de logiciels aussi bien jeux qu'utilitaires, des cours sur le Basic, le CP/M, des programmes, des P.A. et le célèbre supplément Runstrad + contenant les vies infinies et autres bidouilles nécessaires au joueur. Si vous pensez que tous les fanzines sont les mêmes, essayez donc Runstrad, vous changerez certainement d'avis.

NMB

Ce fanzine en est à son numéro 5 et il est tenu d'une poigne de fer par Léon 2 et Bobby Baby. Pour les passionnés de chiffres, il faut savoir qu'il y a 17 pages recto-verso ce qui représente au moins 34 pages. En fait il y en a plus puisque le fanzine Freeware est livré avec. NMB est principalement orienté vers les fanzines, les démos, les tests de jeux, les interviews, les P.A., les bidouilles. Enfin, il est spécialisé en tout, quoi.

EDUCATIF POUR 6128 : FIN DE SERIE

DESTINATION MATHS

- L'essentiel des connaissances en Mathématiques pour les classes de 6e et 5e.
- Une démarche pédagogique et un contenu originaux : Le joueur manipule, trace, pèse, évalue avance des hypothèses.
- Une très grande facilité d'emploi avec de nombreuses aides intégrées.
- Une réalisation générale exceptionnelle : scénario et décors futuristes, animations, musiques.
- Un outil unique de complément et de soutien d'une très grande diversité, aux questions toujours nouvelles, qui accompagnera l'élève pendant toute l'année scolaire.

LANKOR

Pourquoi ne pas prolonger dans le domaine des jeux d'aventure : la suite de la Secte noire est là et elle s'appelle : la crypte des maudits. Vous avez récupéré le grimoire de l'aventure précédente et vous êtes volontaire pour la prochaine. Comment, non ? Vous n'allez pas vous laissez intimider par des histoires de château maudit et de crypte du même métal. Tout pousse à croire que la Secte noire est de retour dans cette crypte où elle perpétue ses activités maléfiques. Votre sang ne peut faire qu'un tour et vous ne pouvez qu'accepter de mettre fin aux méfaits de vos copains en capuche.

UBI SOFT

Une petite compilation pour se mettre en forme ? Voici Rap Pack, un ensemble plutôt «pack» que «rap» d'ailleurs et qui comprend P47, un shoot'em up aérien assez agréable, Stunt Car racer, une course folle sur des circuits tordus, Satan vous entraîne dans les profondeurs de l'enfer, Vixen, son fouet à la main, démolit tous les monstres de la préhistoire, dans Army moves, le challenge est difficile puisqu'il s'agit d'un jeu espagnol et enfin, vous pourrez vous mesurer aux

plus grands avec Championship Sprint qui, comme son nom l'indique est une simulation de course automobile.

Il a déjà été question de Back To The Golden Age mais la version finale est là et le jeu est suffisamment bon pour que l'on puisse en parler à nouveau. L'histoire, je ne vous la remet pas en mémoire mais vous êtes un héros vivant à une époque ancienne indéterminée. Le jeu est un mélange d'arcade et d'aventure avec des objets à ramasser et des combats féroces en temps réel. Pour ajouter un peu de mystère, il y a aussi de la magie, des potions bizarres et des objets aux propriétés étranges.

LORICIEL

Le WestPhaser, ça ne vous dit rien ? C'était un pistolet connectable au CPC et qui permettait une certaine interactivité avec le joueur. Je parle au passé, parce que ce beau projet a duré ce que dure les roses... Enfin, il existait un logiciel livré avec le pistolet, ce programme est de nouveau disponible, sans WestPhaser, et porte le doux nom de Steve MacQueen. Effectivement on utilise maintenant le joystick mais le jeu n'a pas changé : il se déroule dans le vieil Ouest américain et vous êtes confronté à 6 embuscades dans des décors et avec des personnages différents.

Plus original est Paragliding ou Parapente pour les anglophobes. En général, j'évite l'altitude et la montagne parce que j'ai le vertige mais j'ai tout de même essayé Paragliding à cause des graphismes en mode 0 et de l'attrait de la nouveauté. Le problème avec ce jeu, c'est qu'il est plus difficile qu'on ne le pense au premier abord : Les premières descentes (en entraînement) se soldent souvent par des chutes magnifiques. En lisant la notice, on comprend alors qu'il ne suffit pas de se laisser glisser sur l'aile du vent tout en regardant le paysage. La première épreuve consistant à marquer des points en atterrissant sur des cibles, il faut pouvoir manoeuvrer un minimum son parachute afin d'atteindre son objectif. C'est là que rentrent en ligne de compte les vents ascendants ou non. En gros, il faudra prêter attention aux reliefs du terrain avant et pendant le vol.

LA PASSION DU FRANÇAIS

GENERATION 5

Les logiciels éducatifs ne sont pas forcément rébarbatifs, la preuve, les programmes présentés par Génération 5 ne manquent ni de graphismes, ni d'imagination. A la conquête de l'orthographe est un jeu comprenant plusieurs étapes correspondant à plusieurs domaines, l'ergonomie est poussée au maximum avec les déplacements du curseur possibles avec les touches fléchées ou au joystick. Les exercices sont variés et donnent véritablement l'envie de connaître et de découvrir d'autres exercices. Le même principe et la même présentation ont été employés dans le logiciel, les génies de l'académie, un éducatif plutôt destiné aux adultes férus en langue française. Ici, on aborde les subtilités et les petits détails de manière amusante. L'émulation est importante et on se prend rapidement au jeu.

Mais Génération se tourne également vers le jeu pur : avec Challenge Foot vous allez entrer dans les fonctions de président de club. Il y a donc une partie stratégique concernant les finances et autres achats de joueurs. Il ne faudra pas non plus délaisser la partie sportive qui conditionnera vos finances par ses résultats. Challenge existe en deux versions : une pour les moins de 14 ans et une autre pour les seniors, mais dans les deux cas la réalisation est très bonne.

GEST-CAT

Kuy Lim THONG

Valable pour CPC 464-6128

**GEST-CAT est un
gestionnaire de
catalogues «captés». Car
il peut saisir les noms
des fichiers
automatiquement.**

Ce programme BASIC utilise des extensions RSX créées dans un autre programme assemblé en binaire.

Ce dernier augmente un peu sa vitesse d'exécution et laisse une place mémoire de plus de 8 KO à l'utilisateur.

GEST-CAT est compatible avec les trois modèles de CPC.

Son utilisation est très simple avec des menus déroulants. Des fonctions de gestion sont intégrées telles que FICHER, EDITION, RECHERCHE et SAISIE.

Ce programme peut être utilisé comme un mini éditeur de textes ou une gestion de fichiers. Voici une disposition possible d'un tableau :

MODE D'EMPLOI : TOUCHES DU CLAVIER

Vous avez les différentes fonctions des touches du clavier :

- pour déplacer le curseur cligno-

tant dans le tableau, utilisez les flèches :

- les touches flèches : caractère par caractère ou ligne à ligne ;
- Les «SHIFT»-flèches : colonne par colonne ou toutes les 20 lignes .
- Les «CONTROL»-flèches (haut , bas) : début de ligne ou fin de ligne.
- La touche «TAB» permet de marquer le fichier de démarrage lorsque l'on veut créer un MENU-BOOT.
- La touche «COPY» valide une 1ère fois la ligne et la colonne de départ, et une 2e fois la ligne et la colonne d'arrivée, pour les différents traitements dans le menu.
- La touche «SHIFT-COPY» annule la 1ère validation de «COPY».
- Les autres touches du clavier accèdent à la modification des données, en faisant un «bip» d'entrée.
- Pour accéder au menu : tapez «CONTROL-ENTER», «CONTROL-RETURN» ou deux fois «COPY».
- Pour quitter le menu ou les questions, tapez «CONTROL-Q».

FONCTIONS DU MENU

Quant au menu, vous avez le choix des fonctions :

- l'accès au catalogue permet de voir des fichiers, changer les lecteurs A,B ou source, destination.
- La sélection de fichiers se fait par un curseur, sans taper son nom caractère par caractère.
- L'accès au chargement ou à la fusion de fichiers ASCII peut être de format quelconque, de format du gestionnaire de catalogue indiqué

par «.CAT» ou de format de fichiers classés indiqué par «.CLA».

- L'accès à la sauvegarde de fichiers ASCII peut être de format «.CAT», en entier ou sélectionnés, de format «.CLA», classés, ou de format «.TEX», en partie.
- L'accès à l'impression sur papier ou sur fichier se fait avec un choix d'un type de caractère .
- L'accès à l'édition permet de copier, couper, coller des morceaux ou insérer, effacer une ligne.
- L'accès à la recherche permet de classer tout ou en partie, sélectionner selon un critère, vérifier les mémoires de masse occupées suivant : un groupe de fichiers, une face, une disquette, ou tout en fixant le bloc avec «COPY».
- L'accès à la saisie permet de capter les catalogues ou créer un menu-boot après avoir fixé un bloc et choisi les fichiers de démarrage.

En cas de rupture du programme, ce qui n'est pas impossible, il faut lancer le programme à chaud, sans perdre les précieuses données, en faisant GOTO 30.

INSTALLATION DES PROGRAMMES :

Après avoir saisi le programme BASIC, vous sauvez sous le nom «GEST-CAT.BAS» qui est une version structurée avec des REM et dans une autre version ASCII sous le nom «GESTCAT1.» en faisant (SAVE»GESTCAT1».A).

Il s'agit de réduire la taille du pro-

gramme sans les lignes de REM. Lancez un autre programme BASIC à saisir «EFF-REM.BAS» et chargez le «GESTCAT1.», puis après avoir effacé les REM, sauvez sous le même nom.

Pour un chargement ultérieur du programme de façon plus rapide, à ceux qui ne savent pas encore,

chargez avec LOAD "GESTCAT1" et sauvez avec SAVE "GESTCAT.BAS".

Vous pouvez effacer les fichiers "GESTCAT1." et "GESTCAT1.BAK".

Il faut saisir maintenant le programme de codes binaires «GEST.BAS» ; puis lancez ce pro-

gramme qui sauvera sous le nom "GESTCAT.BIN".

Dernier élément très important, il faut modifier la ligne 13 de "GESTCAT.BAS" en posant un code indiqué sur la ligne selon le modèle de CPC.

Voici une disposition possible d'un tableau :

```

!C1 !Nom de la disquette. !remarques complémentaires.

BICRO-KROBIS

Frédéric MEUNIER

Valable pour CPC 464 - 664 - 6128

Ces deux petites routines amèneront un peu de couleur dans les caractères tristes du CPC.

Il n'est pas besoin de faire de longs discours : il suffit de taper les programmes donnés en exemple, de lire le listing Basic, de découvrir les instructions utilisées puis d'expérimenter vous-mêmes.

ANTI ERREURS

Grégory NOE

Valable pour CPC 464,
CPC 664, CPC 6128

Il est difficile de taper un programme d'une revue sans commettre d'erreurs ! Quand les erreurs sont signalées (Syntax error in..., Lines does not exist in...), la correction est facile puisque la ligne est indiquée, mais lorsqu'au "point de vue" du CPC, le programme est correct, il peut en être tout autrement pour le lecteur.

Si le fonctionnement du programme ne correspond pas vraiment au programme original, alors il est impossible de retrouver l'erreur commise, à moins de comparer les lignes de votre programme avec celles du journal, mais c'est très long et on risque de passer sur une erreur sans la voir.

C'est pourquoi ce programme a été créé ; il est à utiliser si vous ne retrouvez pas vos erreurs.

La frappe d'un programme de votre journal favori (CPC) terminée, vous faites "RUN" et là, vous corrigez toutes les erreurs signalées par le CPC en vous référant au journal pour comparer. Si malgré cela, il ne tourne toujours pas, suivez cette procédure :

- sauvez votre programme en ASCII grâce à l'instruction : Save "nom prog", A.

Puis, si vous êtes sur K7, rembobinez la bande jusqu'au début du fichier ;

- chargez Anti-Erreurs ;

- entrez le nom de votre programme et insérez le support où il se trouve (K7 ou disquette).

Après quelques secondes, les numéros de ligne vont défilier. Vous remarquerez qu'à chaque ligne correspond un code de 2 lettres sous cette forme : >XX ; c'est le code qui va vous permettre de savoir d'où proviennent les erreurs. Pour cela, il faut que vous compariez les codes du journal à ceux de l'écran. Si un code diffère, notez sur papier le numéro de ligne qui correspond à ce code. Continuez ainsi jusqu'à la fin du listage. Le défilement terminé, recherchez votre programme et corrigez les lignes que vous avez notées en comparant avec le journal.

Faites "RUN" et, ô miracle !, ça marche. Attention, lors de la frappe du programme à traiter, n'omettez aucun caractère car Anti-Erreurs les prend en compte et bien sûr, ne tapez pas les codes de contrôle.

AXYS

Enfin, l'intégrale pour AXYS. Il s'agit de modifications d'octets par l'éditeur de Discology sur le fichier PROGRAM.AXS

-Vies Infinites : Rechercher la chaîne 75,1A,35,AF,32 et remplacer par : 75,1A,00,AF,32.

-Choix du nombre de vies : Rechercher la chaîne 3E,03,32,75,1A et remplacer 03 par un nombre hexa compris entre 01 et 80 (128 vies), au-delà, ça ne marche pas.

-Energie infinie : Rechercher la chaîne 3A,74,1A,3D,20,12 et remplacer par 3A,74,1A,A7,20,12.

SWAPLAX

Richard Zielkowski trouve le programme Swaplax excellent mais il semble que deux Inconvénients gâchent son plaisir de jouer : Le petit carré «balladeur» met de plus en plus de temps à réapparaître si l'on supprime les couleurs par les lignes du haut (et pour chaque ligne, de gauche à droite). Ceci vient du fait qu'on fait appel aux lignes 2970-3100 pour examiner s'il existe 3 couleurs consécutives sur les lignes, puis sur les colonnes.

Une solution consiste à compter, par ligne et colonne, le nombre de couleurs y figurant.

De plus, le programme ne permet pas d'effacer en même temps ligne et colonne ayant un point commun. voici ces modifications pour que réalisateurs et utilisateurs puissent éventuellement en profiter.

Déclaration d'un tableau des nombres de couleurs par lignes et nombre de couleurs par colonnes.

```
131 DIM nbcllig(25):DIM nbclcol(40)
```

Initialisation à chaque changement de tableau

```
2841 FOR a=1 TO 25:nbcllig(a)=0:NEXT
```

```
2842 FOR a=1 TO 40:nbclcol(a)=0:NEXT
```

Chargement du tableau initial

```
2881nbcllig (a+6) = nbcllig (a+6)+1:nbclcol ( b+1) = nbclcol (b+1)+1
```

Mise à jour du tableau des lignes et colonnes s'il y a au moins 3 couleurs consécutives.

```
3950 ORIGIN x (1),y(1):x4 = x1:y4 = y1:x6 = x1:y6 = y1
```

CODE DE LA ROUTE

Daniel ROBERT

Valable pour CPC 664 - 6128

1ère partie

Vous croyez connaître votre code de la route par cœur ?

Eh bien, essayez donc de vous mesurer à ce programme. Nous verrons bien si vous êtes aussi triomphants après le test. Enfin pour le moment, il ne s'agit que de la première partie, concentrez-vous plutôt sur la saisie des datas pour éviter de faire trop de fautes, on se retrouve le mois prochain.
